(Phone or email)

Please complete this Registration Card, photocopy and return the completed copy to our postal address:
PO Box 6245 Frenchs Forest NSW 2086 or fax it toll free to **1300 553 398**. Your name and contact details will not be recorded.

Remove DataDotDNA PIN label from the lid of the Pod and place here

DataDotDNA[®] Application

- Detach DataDotDNA PIN label from Pod lid and place on the registration form to the left of these instructions.
- Prior to application, spot clean exposed application points.
- Remove cap and slice open the foil seal with a sharp blade; make sure that none of the foil seal falls into the DataDotDNA Pod.
- Replace cap and shake the DataDotDNA Pod vigorously for at least 30 seconds before re-opening and attaching to DataDotDNA Pressure Pak.
- Hold can upright, spray in short bursts the components to be marked with the DataDotDNA; long continuous spraying may cause a loss of pressure in the Pressure Pak.
- Immediately clean up any overspray with the water dampened cloth.

- Occasionally shake the DataDotDNA Pod during the application process; make sure that the breather hole is covered whilst shaking. **Do not invert!**
- Apply DataDotDNA both in hidden and visible areas where the spray can be easily detected by U.V. blacklight.
- You can use up the residual product by using the applicator bud to mark items that are difficult to spray. Eg. mobile phones, cameras, fishing rods and reels.
- Apply warning decals as appropriate.

After application

- Do not expose marked item to water or wet conditions for at least 2 hours after application.
- Unscrew DataDotDNA Pod and allow any remaining adhesive to dry before disposal.
- Properly dispose of used DataDotDNA PressurePak and Pod into landfill or by recycling.
- Register your DataDotDNA PIN against your Driver's Licence or other identifier on the DataDotDNA National Register; either On-line, fax or by post.
- Immediately notify your Insurer that you have fitted DataDotDNA to your property; you may qualify for special insurance discounts or benefits.

DataDotDNA[®] Health & Safety

⚠ Precautions for Use

Safety

- Avoid breathing vapour and repeated skin contact.
- Use with adequate ventilation.
- Wear eye protection during application.
- Keep out of reach of children.
- Do not eat, drink or smoke while using.

● **Computers** ● **Electrical & Leisure Equipment**

DataDotDNA[®] Introduction

What are DataDots?

DataDots are state of the art technology that allows any property to be quickly and effectively marked with a unique DNA.

Property marking is endorsed by all Law Enforcement and Insurance Companies as an effective theft deterrent and DataDotDNA is the 'state of the art' method.

DataDots are smaller than the head of a pin and each DataDot is etched with lines of text by using a sophisticated laser process and are applied to items with a patented spray system including a specially developed adhesive which contains an ultra-violet trace that will fluoresce under a UV black-light.

If thieves want to take your property that is marked with DataDotDNA, they need to be absolutely sure that they remove everything that will assist Police prove true ownership; by applying hundreds of these

tiny DNA tags to your property in random locations and with warning decals fitted, thieves will generally leave it alone and move onto an easier target – property that is not marked.

The nature of DataDotDNA simply makes the task of removal by thieves impossible or too time consuming and therefore your property becomes 'Too Hot to Handle'.

Many famous vehicle manufacturers such as **Audi, BMW, Ford Performance Vehicles, Holden Special Vehicles, Lexus, Lotus, Mini, Mitsubishi, Porsche and Subaru** are all protected by DataDotDNA as a standard feature and the results in professional theft reduction prove the effectiveness.

What's on the Dot?

The information etched on your DataDotDNA is a unique PIN (Personal Identification Number) that you register online on the National DataDotDNA Register against your Driver's Licence, Medicare Card Number, Passport Number or ABN; this is accessible by the Police and allows them to establish who the legitimate owner is. No personal details are kept on the Register.

Your DataDotDNA PIN is easily read by using the handheld microscope included with your DataDotDNA pack; simply remove one of the DataDots and place it on a white background. Turn the microscope light on, centre it over the DataDot with the microscope firmly placed on the background and you will be able to view the image and your PIN.

What do I do if something is stolen?

If as a result of the theft, you need to make an insurance claim, you must report it to the Police and advise them that the property is marked with DataDotDNA.

The Police should issue you with a Crime Report reference number.

Contact DataDot Technology at info@datadotdna.com or **1300 300 829** and notify them of the theft together with the Crime Report number. This information will be updated on the DataDotDNA National Register.

For more information contact DataDotDNA at info@datadotdna.com or visit our website at www.datadotdna.com/australia.

DataDotDNA[®] Instructions

Before you start

- Read this checklist carefully before commencing application of your DataDotDNA and make sure that you have everything and understand the application process.
- Check to make sure that a DataDotDNA PIN label is on the lid of the Pod.
- DataDotDNA is a single use application and is to be used for the marking of auto/recreational accessories and equipment only and must be used immediately upon opening.

Things you need

We provide
